Ham Operators Reaching Out For Contacts

By BETTY JEAN CLAY Sun Staff Writer

Two Corsicana ham radio operators, John Collier and Dr. Ralston Gober, have set up portable transmitters to participate this weekend in a 24-hour emergency simulation that is sponsored annually by the American Radio Relay League.

The simulation is conducted nationwide as a contest among ARRL members who are recognized on the basis of who makes the most contacts with other ham operators around the country.

In times of real emergency, frequently regular lines of communication in a disaster area are disrupted-telephone lines are down and radio and television stations are knocked off the airand ham operators utilizing equipment with portable generators relay messages from elsewhere into the stricken area, or from the affected area to other places which send in help.

During Hurricane Camille which hit Corpus Christi about two years ago, Collier and Gober handled 25 emergency messages to and from Corpus Christi, Both operate as communications specialists for the Red Cross chapter's disaster commitee.

Two years ago when they participated in the annual ARRL emergency simulation contest, they won the District 10 contests for having made the most contacts,1900, with other ham operators. The U.S. is divided into 10 districts, with District 10 embacing the five southwestern states of Texas, Louisiana, Arkansas, Oklahoma and New Mexico.

They set their portable generators, antennas and transmitters up on the roof of State National Bank then.

This year, their location is in a tent behind Collins Middle School. The emergency simulation began noon Saturday and is continuing through noon today.

Saturday the pair moved onto their chosen site, stringing up an antenna in the trees, moving in their individual 200 watt transmitters and a portable generator loaned to them by the Corsicana Emergency Corps.

Under the simulated emergency participants must use portable gasoline fueled generators to provide electricity for energy in transmission.

As soon as they set up Dr. Gober, who has engaged in ham radio operations for 19 years as a hobby, got on the "air" under his call letters "W5ZNN" and Collier, whose call letters are "WB5AIR" has been at his mike sending out calls seeking to contact other ARRL members anywhere in the United States, and answering any operators who calls they monitor. Collier has been a ham operator about seven years.

The Federal Communications Commission requires hams keep a log of all transmissions and these will be submitted to ARRL for its verification of the contacts the Corsicanans and other contestants make, either in answering or sending out messages.

Two years ago Collier's and Gober's furthermost points of contact with other hams were in Venezuela and Brazil. While the simulation is restricted to contacts made within the U.S.. they are both anxious to see how far their call letters reach out this time and receive a response.

Corsicana Here. Who's There?

By ROBERT E. FORD Associated Press Writer

DALLAS, Tex. (AP) - A young man about the neighborhood returned from school the other day and announced to his amazed parents that the teacher had ordered all his seventh-grade class to use deodorant daily.

Noise pollution is ruining our hearing. Instant food is ruining our taste. Now they are going to deprive us of the smell of human beings.

No wonder there is a movement called sensitivity training.

Remember, these specific 12year-olds attend an air-conditioned school, shower after gym classes, probably shower each morning, and change daily into crisp, clean clothing.

There was a considerable difference not so many years ago. We single out the Seymour, Tex., Grade School and Seymour High School of that time only because they were closest to our

This was in the days before automatic water heaters, even before bathtubs in most homes. Schools had a subject called "Health." It stressed that everyone should take a bath twice a

This was easier demanded than done. Each pupil got a star if he swore he did bathe twice weekly. The school at one point reached a crisis. The star quarterback, runner, punter and linebacker was on the verge of flunking "Health." So the teacher allowed him to take two baths in one day to pass the course and retain athletic eligibility.

If you believe the star should have showered after each practice, you just don't understand. There were no school showers.

Taking a bath was a real chore. You put a couple of large kettles on the stove, dragged in a washtub, and tried to adjust the heat of the water in the tub until it was bearable.

It took real effort to pass ""Health."

Frankly, the school's corridors were a little gamey. But you knew those around you were human beings, truly, not robots. One reason you could notice

people when you couldn't see them was that everyone wore long underwear during the cool season, since central heating was unknown.

One teacher, noting that a young fellow didn't even have a fraction of a star on his "Health" card, wrote a letter to the youngster's mother demanding that he bathe.

Came back a reply: "Melvin can't bathe. He's already sewed into his long underwear for the winter."

Now, it's deodorants for schoolboys. The world is coming apart.

'Hell on Wheels' Reunion Planned

The 17th annual reunion of the 2nd Armored "Hell on Wheels" Division veterans is scheduled to be held July 12-16 at the El Tropicana Motor Hotel, San Antonio, according to Gabe

Struggles of Waldron, Ark. Veterans who were in the division and who would like more information about the reunion may write to Col. R. F. Perry, P. O. Box 8116, Wainwright Station, San Antonio, Tex. 78208.

DPS Director Urges Safety

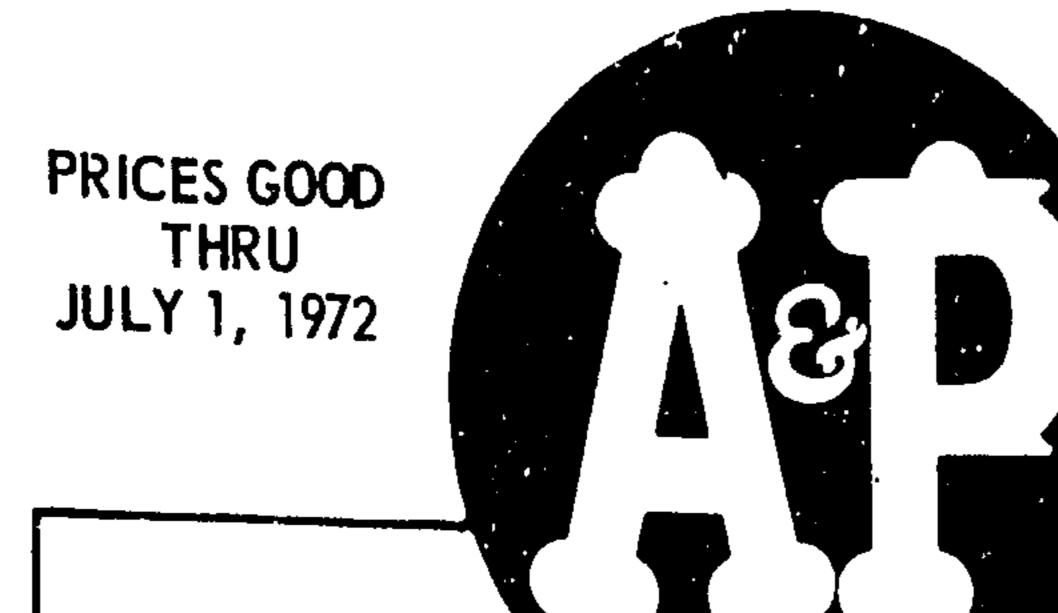

For Holiday

AUSTIN-Colonel Wilson E. Speir, director of the Texas Department of Public Safety, has estimated that traffic accidents would claim 58 lives in Texas during the 102-hour July 4th holiday weekend from 6 p.m. Friday to midnight Tuesday.

The DPS director said if the holiday is typical, approximately one-third of the fatal accidents will involve only one vehicle.

Traffic law violations may contribute to many of the fatal mishaps with the major factors including speed too fast for conditions and driving while

intoxicated. All available Department of Public Safety patrolmen will be on duty, placing special emphasis on drinking and reckless drivers. Across the state, many city police departments and county sheriff's departments will have extra personnel assigned to intensified enforcement efforts.
